## AppleShare Client for Windows: Difference 1.0 to 1.0.2 (11/95)

Article Created: 13 October 1995
Article Reviewed/Updated: 27 November 1995

TOPIC -------------------------------------------------------------

How is AppleShare Client for Windows 1.0.2 version different from 1.0?

DISCUSSION --------------------------------------------------------

The AppleShare Client for Windows 1.0.2 differs from the 1.0 product in several
ways. Version 1.0.2 supports LocalTalk and Token Ring networks, in addition to
Ethernet networks that were supported in version 1.0. Version 1.0.2 also
supports PCs with a PCI bus and includes an updated installer that is much
easier. Additionally, version 1.0.2 supports double-byte languages, enabling it
to be localized in Japanese, Korean and Chinese. Version 1.0.2 also allows rapid
multiple print jobs and large (10 MB+) print jobs to print reliably and
addresses a problem with Cisco router compatibility.

Article Change History:
27 Nov 1995 - Changed to AppleShare Client for Windows 1.0.2.
