AppleShare Client for Windows and AppleTalk Phase I (1/96)

Article Created: 2 November 1995

Article Reviewed/Updated: 19 January 1996

TOPIC -----

I'm unable to access any of the computers on an AppleTalk Phase I network, however, on an AppleTalk Phase II network connections work properly.

DISCUSSION -----

AppleShare Client for Windows does not support AppleTalk phase I. Version 1.0.2 now supports LocalTalk. The solution is to upgrade those AppleTalk Phase I segments to AppleTalk Phase II.
