AppleShare Workstation: Maximum Viewable Volumes (12/96)

Article Created: 2 December 1996

TOPIC -----

What is the maximum number of viewable volumes in the AppleShare client login window?

The reason I ask is our Windows NT server has 200 volumes, and when connecting to the server with AppleShare Workstation client software we can only see 150. We are at the point where AppleShare and the server have been chosen in the Chooser; guest or registered user and password has been entered; then in the volume selection window, only 150 volumes are available to be selected.

DISCUSSION -----

AppleShare Workstation (client software) 3.6.1 or later should support up to 256 volumes. You should upgrade to the latest version of AppleShare Workstation software which can be found on Apple Computer's online software update locations.

These articles can help you locate the software update mentioned here:

- "Where To Find Apple Software Updates" -- Lists online services for free Apple software updates.
- "Obtaining Apple Product Support in the USA" -- Lists 800 numbers and online services for software updates, Apple support information, and a subset of the Apple Tech Info Library.
