LW Bridge 2.0: LocalTalk Printing For Ethernet Users Only-6/95

Article Created: 8 June 1995

TOPIC --

I've loaded the LaserWriter Bridge 2.0 software on a computer connecting the
LocalTalk to Ethernet segments of my network. Users on the LocalTalk segment can
see the printers on LocalTalk in the Chooser, but they cannot see printers on
Ethernet in the Chooser. All of the Ethernet users can access the LocalTalk
printers.

Shouldn't the LaserWriter Bridge 2.0 software let my LocalTalk users print to
LaserWriters on the Ethernet segment of the network?

DISCUSSION --

The LaserWriter Bridge 2.0 software is designed to let Ethernet users print to
LocalTalk connected printers only.

If you are interested in having LocalTalk access to network services on an
Ethernet segment, use the LocalTalk Bridge 2.0 product. This product provides
full connectivity in both directions.
