## LaserWriter Bridge 1.0 Functions as a LocalTalk Bridge (6/95)

Article Created: 8 June 1995

TOPIC -----

Does the LaserWriter Bridge 1.0 do more than just bridge one LaserWriter? Customers sometimes say they are using it to bridge PowerBook computers, Apple MessagePads, and so on.

DISCUSSION -----

Testing indicates that the LaserWriter Bridge 1.0 functions as a full LocalTalk bridge, however bridging occurs for only the first device the bridge recognizes. Use of the LaserWriter Bridge 1.0 for anything other than a LocalTalk network with one LaserWriter Select 360 is not supported.

Testing indicates that MicroPrint hardware functions as a full LocalTalk bridge as well. Again, Apple supports the MicroPrint for use with only the LaserWriter Select 360, although Sonic's documentation indicates that it works with all printers.
