Internet Router: Compatible with LatticeNet Products

This article last reviewed: 5 February 1990

TOPIC -----

Can LatticeNet be used with the AppleTalk Internet Router? Are there any support issues to be considered?

DISCUSSION -----

Apple has been using the Synoptics LatticeNet products with the Apple EtherTalk Interface Card and the AppleTalk Internet Router with no problems.

We can think of no unique support issues that the AppleTalk Internet Router would add to a LatticeNet network.
