Hayes InterBridge: Limits

Article Created: 26 April 1991

Article Last Updated:

TOPIC ---

It appears that my Hayes InterBridges can't handle lots of zones with long
zone names. The InterBridges only process one packet per reply for zone
information. People on the other side of the Hayes InterBridges can see
only 150 zones out of 183.

DISCUSSION --

The 150 zone limit you've discovered is a characteristic of Hayes Phase 1
InterBridges.

	Phase 1	Phase 2
Maximum number of zones	150	250
Maximum number of networks	300	500
Current ROM version of InterBridge	1.12	2.10

Long zone names are not a problem with Hayes InterBridges as they will
support zone names of any length.
