Inter•Poll 1.0: Can Be Either Installed or Drag Copied

This article last reviewed: 20 May 1988

The Inter•Poll 1.0 Installer script installs nothing into the System File; it only installs the Responder INIT in the System Folder. There is no difference between using the Installer script to install Responder or drag-copying Responder into the System Folder.

The Installer script uses the reference to the System File to locate the folder, not to copy an INIT into the System File.
