Request for OS/2 Driver for DayStar's AppleTalk Card

```
This article last reviewed: 19 March 1990

TOPIC -------------------------------------------------------------

I linked DayStar Digital the following question:

Are you planning a driver to allow your MCA AppleTalk card to run in OS/2?

DISCUSSION --------------------------------------------------------

DayStar Digital responded:

As the demand continues to increase, I believe that an OS/2 driver has got to
be in our future; however, it will not be the near future.  We may have had
20 calls in 1989 for the driver, so we have been waiting for demand to pick up.
If the last month or so is any indication, it is time for us to get to work.
Regrettably, even if we find someone to do the driver now, it will probably be
6 to 8 months before its release.
