LocalTalk PC Card Can't Be Used by OS/2, MicroChannel

This article last reviewed: 8 March 1988

Apple's LocalTalk PC Card is not currently hardware-compatible with
the MicroChannel bus architecture, nor is it software-compatible with
OS/2.

The LocalTalk PC Card WILL work with the new PS/2 Model 25 and 30, just
as it works with existing PC XTs, ATs, and most clones.
