LocalTalk PC Card: Available for MS-DOS, Not OS/2

This article last reviewed: 8 August 1989

TOPIC ---

I want to place PCs running OS/2 on an LocalTalk network. Are there any
LocalTalk network PC cards that support OS/2 at this time?

DISCUSSION ----------------------------------

Apple is unaware of any AppleTalk network PC cards with drivers for OS/2. The
AppleTalk network PC card software from Apple contains only MS-DOS drivers.

DayStar Digital makes a MicroChannel version of an AppleTalk network PC card
for PS/2 machines, but again, the DayStar card includes only MS-DOS drivers,
not OS/2 drivers.

While either of these cards can be placed in an OS/2 system, the cards will be
functional only under MS-DOS, since the accompanying software lacks the drivers
for OS/2.
