AppleTalk Plotter: How to Make It Chooser-Selectable

This article last reviewed: 25 February 1991

TOPIC -----

I want to connect an HP Plotter 7550A to an AppleTalk Network and be able to select the plotter from the Chooser.

DISCUSSION -----

There is a plotter driver called "PLOTTERgeist" from Palomar Software that supports many plotters, including the HP 7550A. This Chooser-level driver works in conjunction with the Shiva Net Serial to put the plotter on an AppleTalk network. For contact information, search the Technical Info library under "Palomar Software".
