Article Last Updated:

TOPIC -----

I want to install a 10Base-T Ethernet network. What are the specifications (type of cable, number of conductors, wiring scheme, rj-45 information, and so on) that we need to know to wire a 10Base-T network with a backbone?

DISCUSSION -----

The only available information on this subject comes from the ISO 8802-3/IEEE 802.3(i) specification, which is available to IEEE members.

Search under "IEEE and Contact Information" in the Tech Info Library to find the address and phone number.
