Token-Ring: Macintosh SE Adapter Available

```
This article last reviewed: 15 January 1990

TOPIC -------------------------------------------------------------

Do you know if there is a third-party Token Ring adapter available for the
Macintosh SE or Macintosh SE/30?

DISCUSSION --------------------------------------------------------

Asante Technologies, Inc. has a Token Ring card for the Macintosh SE.
The card supports the AppleTalk Internet Router but does not support Apple's
SMB software.

To locate a vendor's address and phone numbers, use the vendor
name as a search string.
