Token Ring Nodes: Physical or Logical Unit Issues

This article last reviewed: 23 May 1990

TOPIC -----

Are Macintosh Token Ring workstations addressed as PUs or LUs?

DISCUSSION -----

Nodes are either a physical unit (PU) or a logical unit (LU) in an SNA environment.

A Macintosh system with a TokenTalk NB Card running MacDFT or MacAPPC is a downstream PU. A Macintosh system running TokenTalk is neither a PU nor LU -- these terms do not apply unless MacDFT or MacAPPC is being used.
