## Serial NB Card, MacDFTF, and MacAPPC

This article last reviewed: 25 October 1990

TOPIC -----

- 1) Can the Serial NB Card communicate with an IBM mainframe over a 4800-baud modem to CICS?
- 2) Can MacAPPC run over SDLC this way?

DISCUSSION -----

- 1) Yes, via MacDFT 1.1 with the Serial NB Card, running SNA/SDLC.
- 2) Yes, MacAPPC 1.1 can communicate with other LU6.2 devices serially or over Token Ring (Serial NB or TokenTalk NB card, respectively). It is also capable of distributing these sessions from the server machine to other AppleTalk network system nodes using ADSP on LocalTalk, TokenTalk, or EtherTalk.
