Open Transport: Availability and Distribution (8/95)

Article Created: 15 June 1995

Article Reviewed/Updated: 22 August 1995

TOPIC -----

How will Open Transport be made available to customers?

DISCUSSION -----

Open Transport v1.0 ships as a component of the Mac OS on the Power Macintosh 9500. Later, as Open Transport v1.1 is released to support other Mac OS systems it will be made available through a wide range of channels and distribution options including:

- A no-charge upgrade to customers with MacTCP software maintenance agreements.
- A no-charge upgrade to customers with System Software maintenance agreements.
- Single-user and 20-user shrink-wrap retail products.
- A volume license agreement through the Apple Volume Licensing program.

In addition, Open Transport will be made available to developers who have adopted the technology and wish to ship it as a part of their products.
