Open Transport Patch 1.0.1/1.0.7: Which File Is Updated (10/95)

Article Created: 22 August 1995
Article Reviewed/Updated: 3 October 1995

TOPIC --

After applying either the Open Transport (OT) Patch 1.0.1, or Patch 1.0.7, the
info dialog box on selected Open Transport files will not be updated from Open
Transport 1.0 or 1.0.6. Why hasn't the version number changed and how can I tell
which version I have?

DISCUSSION ---

Open Transport 1.0.1 Patch

The Open Transport Patch 1.0.1 patches the Open Tpt Internet Library file
located in the System Extensions folder, and does not update the version of
either the AppleTalk, or TCP/IP control panel. To see if the patch has been
applied, single click on the Open Tpt Internet Library file and select the Get
Info command from the File menu.

Open Transport 1.0.7 Patch

The Open Transport 1.0.7 Patch Read Me file states: "When successfully
completed, the Open Transport Internet Library and the TCP/IP Control Panel will
have been updated to Open Transport version 1.0.7. All other components of Open
Transport will remain at version 1.0.6."

After applying the Open Transport 1.0.7 Patch, selecting the Get Info command
from the File menu on the files below will report the this version information:

• TCP/IP control panel reports: Open Transport 1.0.6, TCP/IP 1.0.7
• Open Tpt Internet Library reports: version 1.0.7

Open Transport stays at version 1.0.6, only the versions of the TCP/IP control
panel and the Open Tpt Internet Library change to version 1.0.7.

Article Change History:
03 Oct 1995 - Added Open Transport 1.0.7.
