Apple Adoption of Open Transport 1.1 - Q & A (3/96)

Article Created: 4 March 1996

Article Reviewed/Updated: 8 March 1996

TOPIC -----

This article is the Reference Q & A (questions and answers) on Apple adoption of Open Transport 1.1.

DISCUSSION -----

Question: When will Open Transport become part of Mac OS?

Answer: Open Transport is included as a standard component of the Mac OS beginning with System 7.5.3 (System 7.5 System Update 2.0).

Open Transport v2.0 is being developed as an integral part of the Copland OS release; support is planned for all Copland platforms, including the PowerPC Platform (formerly CHRP).

Question: What Apple products will support Open Transport? Will these also be native on Power Macintosh?

Answer: Apple includes or plans to include support for Open Transport in the following products, as well many other unannounced products:

- Apple Remote Access 3.0
- MacSNMP 1.5
- Copland release of Mac OS
