PowerShare and System 7.5.3 Incompatible (3/96)

Article Created: 30 March 1996

TOPIC -----

Is PowerShare compatible with System 7.5.3?

DISCUSSION -----

PowerShare has not been tested and is not supported with System 7.5.3. In addition, there are known incompatibilities between PowerShare and Open Transport 1.1. Also, there are no benefits to be gained by running a PowerShare server with System 7.5.3.

Therefore Apple strongly recommends that you do not update a PowerShare server to System 7.5.3 with the System 7.5 Update 2.0.
