Connecting to DEC LAT network

Article Created: 22 April 1996

TOPIC ---

Is there a solution for running LAT on a Power Book 5300 with System 7.5.3 and
Open Transport 1.1 to a VAX running AppleTalk for VMS? I found a copy of the LAT
tool on the VAX, but it froze the Power Book immediately under System 7.5.2 with
classic networking.

DISCUSSION ---

The LAT Tool version 1.3.2 is the most current. There were some problems with
version 1.3.1 hanging systems. We have found version 1.3.2 to be quite stable.
You can contact Digital's CSC for the latest LAT tool.
