## Updating The Driver on Apple RAID 1.0.1 Formatted Disks (1/95)

Article Created: 16 November 1994

Article Reviewed/Updated: 26 January 1995

TOPIC -----

This article describes a serious problem when Apple RAID 1.0.1 formatted disks have their drivers updated with Apple HD SC Setup.

DISCUSSION -----

Apple HD SC Setup version 7.3 allows you to update the driver on any Apple disk, including disks formatted with Apple RAID 1.0.1. Regardless of the instructions for installing new versions of system software, DO NOT update Apple RAID formatted disks with Apple HD SC Setup. Use the Install Driver command of the current version of Apple RAID software.

**WARNING:** If the driver of an Apple RAID formatted disk is updated with Apple HD SC Setup, the Apple RAID partition map will be damaged, and with Apple RAID 1.0.1 no recovery is possible. You will need to re-initialize the disk and all data will be lost.
