AppleShare PC: Checking Compatibility with the TELEX 386?

This article last reviewed:

TOPIC -----

I want to install AppleShare PC on a TELEX 386, models 1285 and 7065.
Will the LocalTalk PC Card work in these machines?

DISCUSSION -----

We aren't familiar with the TELEX 386 (nor do we have documentation on it), and we don't know of anyone who has used AppleShare PC with it. However, you might check these articles in the Tech Info Library.

- "LocalTalk PC Card and PC-Compatibles: Compatibility Issues"
- "LocalTalk PC Cards and AppleShare PC: Compatible Systems"
- "AppleShare PC 2.0: Compatible Network Cards"

They discuss many of the compatibility issues of using the LocalTalk PC Card with IBM PC-clones. After reading the articles, it should become clear to someone familiar with the TELEX whether the two might be compatible and whether it is worth their time to test that configuration.
