## AppleShare PC: Can't Be Put Entirely In Extended Memory

This article last reviewed: 16 March 1988

Some AppleShare PC users have asked if there is a way to put all of AppleShare PC in extended memory. It seems that many new applications for the PC (particularly those with Microsoft Windows) don't have enough memory when AppleShare PC is installed. We know of no present way to put all of Appleshare PC into extended memory.
