AppleShare PC: Problem with Zenith Multi-I/O Card

Article Created: 12 August 1991

Article Last Updated:

TOPIC ---

I am running AppleShare PC on the LocalTalk PC card on a Zenith Z386 PC
(with a Zenith multi-I/O card). When I try to run DA, it says "scanning
for zones" and then locks up.

DISCUSSION --

Remove the Zenith multi-I/O card. The card may be trying to intercept any
information sent to the LPT ports, which is what AppleShare PC does.
