H.320/ISDN Test System (6/96)

Article Created: 5 June 1996

TOPIC -----

This article describes a method to test your H.320/ISDN system using Apple Media Conferencing.

DISCUSSION -----

Question:

How can I test my H.320/ISDN system using Apple Media Conference?

Answer:

Vivo Software Inc. maintains the 'Vivo320 Test Call Center' H.320 videoconferencing system set to auto-answer 24 hours a day and 7 days a week. Their telephone number for the video conferencing is 617-492-0911. Vivo Software uses a 5ESS switch so there is only one phone number to dial. Launch Apple Media Conference then ensure these settings have been set correctly.

Begin_Table

Setting menu

 Preferences

 Conference

 Connection type: H.320 card

 Connect via:

 ISDN, 2 channel

 or

 ISDN, 2 channel, 56k adaptation

End_Table

Once the settings are correct, select "Call..." from the File menu. Remember to enter any prefixes to access an outside line (8 or 9) or any applicable long distance prefixes (1 or long distance carrier prefix).

The Tech Info Library article titled "Locating Vendor Information" can help you search for Vivo Software's address and phone number.
