MAE: Application Compatibility List (6/96)

Article Created: 17 May 1994
Article Reviewed/Updated: 25 June 1996

TOPIC --

Apple has worked with a number of software vendors in order to optimize
functionality and performance of their applications running under the Macintosh
Applications environment (MAE), and to ensure that leading Macintosh compatible
applications are also compatible with MAE. In order to verify that MAE supports
major functionality of key Macintosh applications, Apple has used the following
software titles with MAE version 1.0 and found them to operate normally. As
testing continues, (either by Apple and/or ISVs) Apple expects to add many new
titles to this list.

Many other applications may run, but those applications have either not been
tested by Apple or reported tested by the ISV. In general, those applications
which support Inside Macintosh specifications and run 32-bit clean should run on
MAE.

For more information about the compatibility of a particular program please
contact the software vendor.

Apple provides this list for information purposes only, and the list does not
represent a product endorsement on the part of Apple.

DISCUSSION ---

Company	Product
ACI	4th Dimension (To get the version of 4th Dimension, users should contact ACI directly to receive a 1.4 MB key disk for 4th Dimension)
	4D Client
	4D First
	Object Master
Aladdin Systems	Stuffit Expander 3.0.7
Aldus Corp.	Persuasion 2.12
	PageMaker 5.0
	Freehand 4.0
