MAE Trial: Installer Can't Find Installation Packages (6/94)

Article Created: 24 June 1994

TOPIC ---

I grabbed the trial version of MAE from your ftp server, and am having problems
trying to install the package. I have no problem uncompressing and untarring
the file, but when I try to run the INSTALL.SH I get the following error
message: The Installer cannot find the installation packages.

I do get an information screen displayed before I get this message. Is there an
obvious workaround for this? When I enter the following command:

  zcat MAE_SOLARIS.tar.Z|sum

I get a checksum of 4704 42700, in case it is a transfer problem.

DISCUSSION ---

This error might occur if your current directory is not the same as the one
containing INSTALL.SH. In addition, the variable INSTALL_SRC should not be set
(the Installer uses this variable to select a non-standard installer script --
for testing purposes).
