MAE 1.0a Patch Error: Patch Cannot Be Applied (11/94)

Article Created: 1 November 1994

TOPIC -----

When installing the MAE 1.0a patch on my system, I got the following error:

This patch cannot be applied because your copy of MAE is invalid, or you have already applied this patch, or a newer patch. Please correct the above problems and rerun the patch program.

What's going on?

DISCUSSION -----

Check the version of MAE currently installed on your system by launching MAE with the `-version` option:

```
~appledir/bin/mae -version
```

Either the MAE 1.0a patch was already installed, or you have a newer version of MAE which the patch cannot update.
