MAE 2.0: MacInTax 1994 Cannot Save To Hard Disk (4/95)

Article Created: 12 April 1995

TOPIC -----

This article describes a workaround when MacInTax initially saves a file to the UNIX hard disk with MAE 2.0.

DISCUSSION -----

Here is a workaround, save the MacInTax file to a floppy disk instead of the hard disk. You can then copy the MacInTax file in the Finder from the floppy disk to the UNIX hard disk.

It appears that MacInTax has a problem creating the file on the hard drive but not a floppy disk. Once the file has been dragged to the hard disk, MacInTax can open and update it without difficulty.
