MAE: Disk Copy and DART Image Files (5/95)

Article Created: 10 May 1995

TOPIC -----

I have Disk Copy and DART disk image files to load software, but I cannot get them open. I have tried using Mount'em without success either. Is there any software available so these image files can be used?

DISCUSSION -----

We have used ShrinkWrap to mount Disk Copy and DART image files in MAE 1.0a. ShrinkWrap is freeware written by Chad Magendanz. To mount an image you drag the image file onto the ShrinkWrap icon. Also be sure to set the preferences by clicking to select store in memory.

You can find ShrinkWrap at most Macintosh ftp sites including:

<ftp://mirror.aol.com/pub/mac/util/diskfile/shrinkwrap1.21.sit.hqx>
