MAE 2.0 and Volumes Larger Than 2 GB Problem (6/95)

Article Created: 6 June 1995

TOPIC -----

MAE 2.0 on Solaris 2.4 shows negative file sizes on volumes larger than 2 GB. Some of my application's installers will not install because there is not enough disk space. My home directory is a volume larger than 2 GB.

DISCUSSION -----

This is a known issue and has been reported to engineering for investigation. As of June 1995 there is no time table for resolution.
