Postscript Errors Printing From MAE to Sparc Printer (6/95)

Article Created: 30 June 1995

TOPIC -----

I'm having a problem printing from MAE 2.0 on a Sun workstation with SunOS Solaris 2.3 using Newsprint 2.5 to a Sun Sparcprinter. This printer works fine in UNIX. I've tried both lp and lpr, and selected LPRWriter with the Generic printer description, and I get the following error printed without any other text: error offending command, f3_1. Do you know what is wrong?

DISCUSSION -----

This Sun configuration ships with only the courier font enabled. For additional postscript fonts to be used (as needed by MAE), the Font Password must be ordered from Sun which licenses these fonts.
