MAE 2.0: Booting from boot2 resources fails! Fatal Error (5/96)

Article Created: 14 May 1996

TOPIC -----

When starting MAE up, the following error occurs in the shell that MAE started from:

```
# Booting from boot2 resources fails!  
# Fatal error in Toolbox
```

MAE will not start at this point. MAE was running just fine previously.

DISCUSSION -----

A file in the user's HOME System Folder appears to be corrupt. To correct, try these options:

- 1) In a shell, delete the ".fs_cache" file in the System Folder, then restart MAE.
- 2) If the above does not work, rename the user's System Folder, and launch MAE. This will force MAE to create a new system, and the user can then copy desired control panels and extensions from the previous System Folder to the new one.
