MacX25: Multiple Workstation Support

```
Article Created: 2 August 1991

TOPIC -----------------------------------------------------------

How many workstations does the MacPAD software (shipped with MacX25)
support?

DISCUSSION ------------------------------------------------------

If each workstation uses only one virtual circuit, 64 workstations can
access the MacX25 server simultaneously.  However, applications can be
written so that multiple circuits can be accessed by one workstation;
therefore, the number of workstations that can be supported depends on how
the application is written.
