GeoPort: Won't Answer Incoming Calls In Originate Mode (4/94)

Article Created: 6 April 1994

TOPIC ---

I want my GeoPort adapter to answer an incoming call in "originate" mode. It
works with my external modems - that is I issue an "ATDT" command when the
phone is ringing and the modem grabs the incoming call. With the GeoPort, I get
a port in use error.

DISCUSSION --

With the Express Modem and GeoPort, there is a time delay of 6 seconds between
when a ring is detected and when you can issue a an "ATDT" command. The way to
eliminate this would be to type "ATH1DT" instead of "ATDT". The "H1" forces the
modem to go off-hook. Once off-hook, the "DT" command can be issued causing the
modem to think it is the originator.
