Global Village Modem and Two Line Telephone (7/94)

Article Created: 19 July 1994

TOPIC -----

I have a Performa 575 with a bundled Global Village TelePort Bronze Modem. I would like to know if a two line telephone would work with the Global Village modem?

DISCUSSION -----

There are two possibilities:

- 1) If your two line telephone uses a specialized ring, you will have the same problems as if you had call waiting enabled. The second line can interrupt your modems data and FAX transmissions.
- 2) If you have two actual lines, you should have little difficulty, as all four wires are passed through the modem connection.
