Apple Telecom 2.0 and Express Modem (4/95)

Article Created: 27 April 1995

TOPIC -----

I've seen that Apple Telecom 2.0 has been released. From looking at the Read Me, I cannot tell for sure what I'm gaining if I have an Express Modem. Can you please describe the features from a PowerBook standpoint, for example, does MegaPhone work with the Express Modem?

DISCUSSION -----

No, MegaPhone does not work with the Express Modem. You do get QuickDraw GX support, and the network shared Fax feature. We recommend the use of the latest software available, so updating to Apple Telecom 2.0 is advisable.

Also QuickDraw GX support requires QuickDraw GX 1.1 or later. This does not come with System 7.5 Update 1.0 or with the Apple Telecom 2.0 software. These articles can help you locate the QuickDraw GX software mentioned here:

- "Where To Find Apple Software Updates" -- Lists online services for free Apple software updates.
- "Obtaining Apple Product Support in the USA" -- Lists 800 numbers and online services for software updates, Apple support information, and a subset of the Apple Tech Info Library.
