Global Village Modems: Cropping on Legal Size Faxes (9/96)

Article Created: 17 September 1996

TOPIC -----

I have a Macintosh Performa computer that was bundled with a Global Village modem. When I attempt to fax a legal-sized document, the image is cropped in unusual places. How can I prevent the fax from being cropped?

DISCUSSION -----

According to Global Village, you should have a margin of at least 1/2 inch in any document that you are planning to fax. Otherwise, unwanted cropping may occur.
