## GeoPort & EM Updater: Change History (2/97)

Article Created: 15 February 1997
Article Reviewed/Updated: 19 February 1997

TOPIC -------------------------------------------------------------

This article is a brief description of the GeoPort and Express Modem Updater
change history.

DISCUSSION --------------------------------------------------------

3.0 - Added V.34 functionality, up to 28.8 kbps, for GeoPort hardware running on
a Power Macintosh computer and fixed minor bugs. Based on Apple Telecom 3.0.3
(ships in Japan only).

3.1 - Implemented up to 33.6 kbps connection speeds on GeoPort hardware running
on a Power Macintosh computer, and fixing a memory fragmentation issue with the
software. This update was never posted because it was superseded by 3.1.1

3.1.1 - Fixed the installer script. The installer was removing the old GeoPort
Extension on a Macintosh Quadra AV computer, but not installing the new one.

This article was published in the 19 February 1997 "Information Alley."

Article Change History:
19 Feb 1997 - Added Info Alley information.
