Netware: Broadcast Message Character Limit (9/93)

Article Created: 29 September 1993

TOPIC ---

My customer is sending a broadcast message from one Macintosh to another
via a Novell server. They are suppose to be able to send 80 character
messages but are being limited to 28-30 characters (like a PC). Is there
something we can do to get around this?

DISCUSSION --

This is a known problem to Novell that is improved by using the version of
Network Tools that ships with 4.x, or with the 3.12 upgrade. The new limit
is 44 characters.
