## Macintosh II To Convergent Technologies Connectivity

Article Created: 6 September 1988

### Article Change History

- 
- 1/20/93 - UPDATED
    - Vendor information.
  - 8/04/88 - REVIEWED
    - For accuracy.

Users who want to connect a Macintosh to Convergent Technologies equipment running their proprietary operating environment, CT\*OS, take note:

Midwest Data Source makes a software package called Contact which will allow connection into BTOS (you can connect as a Burroghs MT-983, TD-730, or an ET-2000 terminal).

BTOS is an extension of CT\*OS, and Contact supports the Burroghs B2X family running BTOS. The package supports also supports file transfer.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
