PATHWORKS 1.0 & PageMaker: Problem Printing through VAXshare

Article Created: 7 November 1991

Article Last Updated:

TOPIC -----

I'm using PATHWORKS 1.0. I have difficulty printing PageMaker documents, especially ones with complex graphics, when using VAX/VMS print queues to spool Apple LaserWriter printers. I suspect this has something to do with the Aldus Prep PostScript dictionary file not being passed to the printer by PATHWORKS. Is there a workaround?

DISCUSSION -----

VAXshare Print Services in PATHWORKS is a component developed by Digital. Digital Customer Support Center (CSC) in Atlanta confirmed that they are aware of this problem, and that they already escalated it to Digital engineering.
