DAL for AS/400: Sources of Additional Information

Article Created: 25 January 1993

TOPIC -----

This article describes some sources of information, from Apple, on DAL for the AS/400.

DISCUSSION -----

The Data Sheet (p/n L0353LL/A) gives a detailed overview of the product, how to order it, and tells what support groups can assist with installation.

The Data Access Language Server of AS/400 Installation Guide, version 1.3.7 (p/n R0445LL/A) covers in detail installation of the Server application on the AS/400, setting up access to SQL/400 databases, and how to configure both the AS/400 and the SNA•ps APPC gateway.

Apple has a Network Information Line for DAL, 408-862-3385, which CUSTOMERS can call to get more information about DAL and SNA•ps gateways. If a customer wishes a 90-day evaluation of the DAL product, use the Information Line to arrange this free service.

The DAL AS/400 Server product is also backed by an initial 90-day free software support 800 number. This support service applies to the 90-day evaluation process or the initial 90 days of a purchased server. After the initial period, support contracts are available for a fee.

The Apple Serial NB Card, Apple Token Ring 4/16 NB Card, DAL servers, DAL Client for Macintosh, and SNA•ps Gateway can be ordered from any Apple sales office or network products certified dealer. For information about location of resellers, contact Apple toll-free in the United States, 1-800-538-9696. Apple NuBus cards and SNA•ps Gateway can also be ordered from the Apple Catalog in the U.S. using 1-800-795-1000.
