SNA•ps Gateway and 3270: File Transfer and Printer Support

Article Created: 7 October 1991

Article Last Updated:

TOPIC -----

I just installed a TokenTalk card and the SNA•ps gateway and 3270 applications in a Macintosh IIsi. It's connecting to a mainframe through an OS/2 LanServer. We want to do file transfer and make use of printers on the system. Does SNA•ps support these needs?

DISCUSSION -----

SNA•ps 1.0 supports IND\$FILE transfer to TSO, CMS, and CICS. The manual documents this. There is no file transfer to the LANServer, only through the IBM host.
