Apple IIe: How to Transfer files to a PC

Article Created: 14 May 1991

Article Last Updated:

TOPIC -----

I want to transfer files between an Apple IIe and an IBM PC. Can I "print" out of my Super Serial card into the RS-232 port of the PC? What cable should I use?

DISCUSSION -----

Connect your two computers with a RS-232 null modem cable, and use a terminal emulation package on the PC to capture the file. When you tell the Apple IIe to print, the PC needs to be in the file-receive mode.
