DAL 1.2: Current Release Runs under TSO

Article Created: 22 February 1991
Article Last Reviewed: 30 June 1992
Article Last Updated: 20 June 1992

TOPIC -----

Does a DAL Server on an IBM mainframe run in its own address space or does it run under TSO?

DISCUSSION -----

Data Access Language Server for MVS/TSO runs under TSO and uses a TSO session for each user. Data Access Language Server for MVS/VTAM (available from APDA) runs in its own address space or a Batch job or Started Task, and allows access through CICS and VTAM directly with no TSO overhead.
