TOPIC ---

Are there any plans for a 3270 connection tool for the Communications
Toolbox?

DISCUSSION --

Advanced Software Concepts has acs3270, a terminal tool to allow access to
IBM computers using TCP/IP. It will also support AS/400 connections. They
are planning to support DEC SNA/Gateways within the near future.
Educational institutions get a special discount. Site licensing is
available upon request. Special feature for those very large accounts: a
special installer that lets the system administrator freeze some or all
settings.

For contact information, search the Technical Info library under "Advanced
Software Concepts."
