Communications Toolbox Tools: Basic Connectivity Set (3/95)

Article Created: 28 March 1995

TOPIC -----

This article describes the Communications Toolbox basic connectivity set of tools, and how to obtain them.

DISCUSSION -----

Communications Toolbox tools are designed to be used with Communications Toolbox aware applications. There are three types of tools; connection, terminal, and file transfer. The Basic Connectivity Tools are available via AppleLink, the Internet, and other online services. Most software packages that support the use of Communication Toolbox Tools will include some basic tools, for example MacTerminal 3.0 and ClarisWorks. There are also additional tools available from third parties, for example Kermit, LAT Tool and VT 320. For details on using these tools see the documentation for the Communications Toolbox aware application you will be using them with.

The Basic Connectivity Tools include:

Connection tools

Serial Tool
Modem Tool
AppleTalk ADSP Tool

Terminal tools

TTY
VT-102

File Transfer tools

Text
XMODEM
