PowerShare: Software Components (9/93)

Article Created: 28 September 1993

TOPIC -----

What software components are included in the PowerShare Server Package?

DISCUSSION -----

The PowerShare Server Package consists of the following software components:

- 1) The PowerShare Catalog Server, which provides catalog and authentication services.
- 2) The PowerShare Mail Server, which provides messaging and mail services.
- 3) PowerShare Admin, an application which provides an administrator with the ability to manage and monitor the servers and catalog. With this application, you can administer a PowerShare System from any Macintosh on the network.
- 4) PowerShare Easy Setup, an application which allows you to quickly set up a PowerShare System that includes one PowerShare Catalog Server and one PowerShare Mail Server on a single Macintosh. The PowerShare System and services.
